Director's Welcome

As the Director of the Master of Science in Computer Science program (MSCS), I am excited to welcome each of you. When you graduate, you will be recognized as one among the finest computer scientists in the world. You will be part of the elite network of Carnegie Mellon computer science alumni dating back to our first graduate program in 1965.

We have designed the MSCS curriculum to be as flexible as possible. Within broad guidelines, you and your advisor will design your own course of study. There are thesis and non-thesis options, as well as three-semester and four-semester tracks. So whether you are here to pivot to computer science, to springboard to a Ph.D. program, or simply to extend your reach as a computer scientist, the MSCS curriculum can accommodate you.

Our goal is to help you become a world-class technical leader. You will attend compelling lectures by top researchers and experts, and undertake projects of scale and complexity. You may have the opportunity to do a summer internship with leaders in industry or top-flight research groups on and off campus. By graduation you will have a mature understanding of computer science that will serve you for the rest of your career.

Throughout the program, you won't be alone. You'll be supported by academic and career advisors, engaged faculty members, dedicated teaching assistants, and your talented peers. You'll find that the best part of the MSCS program is the tremendous group of people that it brings together.

If you are new to Pittsburgh, you'll find it to be a wonderful place to live. As a collection of neighborhoods, hosting world-class industries, medical centers, and institutions of higher learning, Pittsburgh offers the convenience of small-town living with the richness and diversity of an international city.

If I can help in any way, please don't hesitate to contact me at droh@cs.cmu.edu. Welcome!

David R. O'Hallaron,
Director

Program History

“Computing at Carnegie Mellon evolved the way it should everywhere but doesn’t. There was a confluence of minds, tools and problems...and an appreciation of potential and consequences that spread far...”

—Alan Perlis, first department head

Led by a group of visionary enthusiasts, including Allen Newell, Herbert Simon, and Alan Perlis, the Department of Computer Science was formed in July 1965, with Alan Perlis as its head. As one of the first such departments in the United States, its creation was what now seems an inevitable step. From the very beginning, Computer Science at Carnegie Mellon was interdisciplinary and, in fact, drew its early strength from this meshing of students and faculty from the component disciplines. It was clear that an expansive approach to the field, fueled with solid science and a focus on the training of a new generation of scientists, would best serve the purpose of our campus and the industrial/academic community at large. This was a budding field, and Carnegie Mellon would be serving a critical role in populating the discipline with “trained professionals” who would be able to expand the parameters of what a computer could do and be used for.

Since its founding in 1965, the original department grew to form the School of Computer Science (SCS), which blossomed to encompass seven diverse units: the Computer Science Department (CSD), The Robotics Institute (RI), The Human-Computer Interaction Institute (HCII), The Language Technologies Institute (LTI), the Machine Learning Department (MLD), the Institute for Software Research (ISR), and the Computational Biology Department (CBD).

After many years of discussion and more than a year of detailed planning, the Computer Science Department launched the MS program in Computer Science. The first class was admitted in the spring of 2012 and graduated in the winter of 2013.

Program Overview

The M.S. in Computer Science program offers students with a Bachelor's degree the opportunity to improve their training with advanced study in Computer Science. We cater to students with basic analytic skills and a strong aptitude for mathematics, programming, and logical reasoning. An undergraduate degree in computer science is not required.

The program is not based on a fixed set of courses. Instead, students construct their own course of study, in consultation with their advisors, within broad guidelines. Thus, a student may choose an area in which to specialize (such as networking, machine learning, or algorithms) or choose not to specialize at all. Carnegie Mellon faculty conduct research in diverse areas within the computer sciences and, when there is mutual interest, provide opportunities to Master's students to participate in research, and related activities such as publications, the preparation and defense of a Master's thesis, etc.

Most students will complete the program in three semesters. Students switching into Computer Science from another field may require additional time to fill in gaps in their undergraduate training (see "Curriculum").

The program is distinct from the Doctoral program in Computer Science: Master's students will not necessarily continue into the Doctoral program. M.S. graduates are welcome to apply to the Ph.D. program, but will not receive preferential treatment.

Program Outcomes

Because the MSCS program targets student-centered intellectual inquiry and educational diversity, the curriculum is not as prescriptive as that of other programs. However, the program is designed to achieve certain shared core outcomes.

Graduates of the MSCS program should be able to apply the core principles and approaches of Computer Science, together with specialized knowledge of selected sub-fields, to analyze and solve current and emerging problems, and to remain engaged as the field develops. In particular, students will be able to:

1. analyze and prove the properties of algorithms, software, and/or computing systems using the theoretical underpinnings of Computer Science;
2. analyze, design, and construct software which contributes to large, multi-layered/multi-machine systems;
3. analyze, design, and construct software which employs intelligence and learning to solve complex, open-ended, and/or noisy real-world problems; and
4. select, implement, deploy, and/or develop viable solutions to current and emerging problems within one or more sub-fields of Computer Science.

Students completing the Applied Study degree program will be able to apply knowledge obtained via an academic setting in a professional or research environment.

Program Orientation

Orientation is mandatory and is held in the week before the start of classes: Tuesday, August 25, 2020 and Wednesday, August 26, 2020, from 9:30 a.m. to 11:30 a.m. (Pittsburgh time). Please plan to attend the entire orientation event.

During the orientation event, we will do our very best to welcome you to campus and the city, and to help you feel at home here, and get to meet your colleagues and key people on campus. We will review important policies, discuss important campus and community resources, and help you to understand Carnegie Mellon's rich academic culture and traditions. We will help you get registered for classes.

Selecting and Registering for Classes

You will be contacted by an Academic Advisor prior to your arrival on campus. Your Academic Advisor will discuss your background, academic interests, career interests, and goals with you. Together with your Academic Advisor, you'll select courses for the Fall semester.

You will register for classes before the first day of classes. Orientation is a convenient opportunity. Though rare, it is possible that some of your preferred classes will have wait lists. These usually get sorted out within the first few days of classes. Your Academic Advisor can help you understand the likely impact upon your intended schedule of being waitlisted for a course.

Primary Contacts for the MSCS Program

If you have a question about how to accomplish a goal or procedure related to being an MSCS student, you should probably begin by contacting one of these five individuals.

Angy Malloy, Program Administrator

412-268-6914, GHC 9006, amalley@cs.cmu.edu

Angy is responsible for the day-to-day administration of the Program. She is the first place you should turn for information about the Program, and can help you with most of your concerns or connect you with those who can.

David A. Eckhardt, Associate Program Director

412-268-6720, GHC 4001, deou@andrew.cmu.edu

Prof. Eckhardt is the primary initial point of contact for any academic concerns, including academic advising and planning, class offerings, registration, research opportunities, teaching assistant opportunities, etc.

Katelyn Livingston & Allison Viverette, Career Counselors

West Wing second floor, kjliving@andrew.cmu.edu/aviveret@andrew.cmu.edu.

Katelyn and Allison provide tremendous resources for students. They work alongside your Academic Advisor, and specialize in helping computer science students find job and internship opportunities, prepare for interviews, compare offers, and search for the right career path.

David O'Hallaron, Program Director

GHC 7517, droh@cs.cmu.edu

Prof. O'Hallaron is the Director of the Program and is ultimately responsible for the curriculum, policies, procedures, and practices. The best way to get in touch with him is to contact Angy for an appointment or to e-mail him directly.

Other Leadership Roles

The MSCS program is hosted by the School of Computer Science. Most students will not need to interact with the SCS leadership directly, but it is probably useful for you to know who is in which role.

- Srinivasan Seshan, Department Head, Computer Science Department

- David Garlan, Associate Dean, Master's Programs, School of Computer Science
- Martial Hebert, Dean, School of Computer Science

About This Document

This document will describe the curricular requirements of the program and will then present some academic and administrative policies that will govern your time here. It will also refer you to various sources of policy, information, and support outside the program itself. We encourage you to read it all the way through, from start to finish, and to take notes on the surprising and useful things you discover (we expect there will be some).

Acknowledgements

Paul Mazaitis of the English Department has graciously contributed macro, layout, font, and readability advice. Any remaining document-design infelicities should be attributed to the staff of the MSCS program, not to him.

Curriculum

The Master of Science program in Computer Science gives students advanced study in Computer Science. The program is not based on a detailed required curriculum. Instead, students create their own course of study in consultation with their advisor.

In general, students must satisfy four (4) Requirements:

1. Total units: completion of a sufficient quantity of graded coursework.
2. Breadth: At least one pre-approved 9-12 unit course in each of three areas: AI, Systems, and Theory. In each area many courses are listed as pre-approved. Others may be approved on a per-student case-by-case basis, as the Program may deem consistent with the student's academic plan.
3. "Qualifying" units: completion of a sufficient quantity of Program-approved graduate or advanced undergraduate classes.
4. "MSCS elective" units: a limited quantity of coursework may be in otherwise unapproved graduate-level courses at Carnegie Mellon or otherwise unapproved courses, at any level, within the Computer Science Department.

The program has three variants, as summarized in the table below and further discussed in "Degree Variants."

Feature	MSCS-3	MSCS-AS	MSCS-4
Degree title	Master of Science in Computer Science	Master of Science in Computer Science—Applied Study	Master of Science in Computer Science—Foundational Studies
Program length (15-week semesters)	3	3	4
Total units	108	114	144
"Qualifying" units	at least 96	at least 96	at least 108
"MSCS Elective" units	up to 12	up to 12	up to 36
Research	(optional)	(optional)	(optional)
Internship	(optional)	required	(optional)

Breadth Areas: AI, Systems, Theory

- Any course specifically listed by the Program as a pre-approved course in the specific breadth area (see Appendix).
- Any course pre-approved by the Program on a case-by-case basis, based upon consideration of the syllabus and/or other descriptive materials, the spirit of the requirement, and the student's individual academic plan.

Qualifying Courses

- Any graduate course offered by the Computer Science Department (15-6xx and higher), except: "courses without prescribed content" (see below), "special topics" courses, 15-9xx courses, and courses in computer science intended for other than computer scientists, e.g., 15-650. Selected "special topics" courses may count as Qualifying (including potentially fulfilling Breadth requirements) with Program approval.
- Any course specifically listed by the Program as a pre-approved Qualifying course (see Appendix).
- Any course approved by the Program for an individual student, based upon that student's proposed course of study. Such courses might, for example, include independent study or research courses, or courses offered by other departments.
- Although there is no guarantee, and permission must be obtained by each student in each instance, the Program will often approve graduate-level and 4xx-level courses offered by other programs within SCS or ECE, within the offering program's area of specialization, intended for and qualifying for the offering program's own M.S. and/or Doctoral students.

Courses Without Prescribed Content

- Examples include independent study, practicum, seminar, colloquium, and/or research courses.
- Regardless of offering department, these courses count as MSCS Electives, unless specifically pre-approved, in each instance, as Qualifying, or as satisfying a Breadth requirement.
- In general, no more than 12 units of such courses will be accepted as requirements-satisfying, even across multiple categories.

- Students completing a thesis may be an example of a special case and approved by the Program, as appropriate, to receive 12-24 Qualifying units for associated self-defined courses. In these cases, credit beyond 12 units is typically awarded only upon acceptance of the thesis.

Degree Variants

Switching

It is important to note that students cannot freely switch among degree variants. Switching requires Program approval and may involve other logistical issues as well. For example, international students would need approval from the Office of International Education, *which is usually not possible*. Thus it is important for students to carefully consider their situation during the application process, and again when enrolling in MSCS. *Because it may not be possible to switch, students should affirmatively plan to be committed to one degree variant before arrival at CMU.*

Applied Study Variant

In the core MSCS program, and also in the Foundational Studies variant, both research and formalized real-world application of computer science are optional. Students completing the requirements of those degree programs are free to use their summers for industry or research internships, volunteer work, research or employment on campus, or for a vacation. However, applying classroom learning to real-world problems in an intensive fashion helps many students firm up, or change, their career plans. The Applied Study variant is designed for students who wish to formalize and recognize the augmentation of their academic coursework through a real-world application. The modified degree title provides certification that a student's educational experiences included an applied-study component.

Students in the Applied Study degree program complete the requirements of the core 108-unit MSCS program, plus an additional 6 units of applied-study coursework and a required summer applied-study experience. In a Fall or Spring semester, students complete 15-690 (MSCS Career Preparation), a 3-unit class in which a student works with the student's Advisor and staff from the Career Center to clarify objectives for the applied-study experience and to seek, develop, and select among opportunities. In a Summer semester, students satisfy the applied-study requirement by completing an industry (or government) internship. Concurrent with the applied-study experience, students complete 15-691 (Practicum). The Practicum class represents the integration of the experience into the curriculum, supervised

by a faculty member, including structured career-advice interviews and a post-experience reflection. The MSCS program cannot guarantee the availability of a paid industry internship for every student. As a fallback, software development opportunities are available in SCS and elsewhere at Carnegie Mellon.

Foundational Studies Variant

Many of the required courses assume a level of competency in foundational areas similar to that typically possessed by graduates of Carnegie Mellon's B.S. programs in Computer Science or Electrical and Computer Engineering. While most students complete coursework achieving the Program's educational outcomes in three semesters, for some students a four-semester timeframe is more appropriate for achieving those outcomes.

A four-semester course of study may be a good fit for students coming from other disciplines, students who have been out of school for an extended period, or students whose former education in computer science lacked rigor in a specific foundational area. Students pursuing the four-semester degree will, with their Advisor, agree on a selection of classes in the "MSCS Elective" category which provide the necessary foundational work. Depending on a student's background and aspirations, foundational work might occupy the whole first semester of residence, or might be spread across semesters so that the student can pursue advanced coursework in an area of strength immediately upon arrival.

When selecting foundational course work, the following topic areas and related courses are commonly of interest:

- Imperative or Object-Oriented Programming: Understanding of the object-oriented or imperative programming paradigms and confidence in software design and implementation in a corresponding compiled language, such as C, C++, or Java. [Mitigate with 15-122, 15-213/513, and/or 17-514]
- Functional Programming: Understanding of the functional programming paradigms and confidence programming in a corresponding language, such ML, Haskell, or OCaml. [Mitigate with 15-151/21-127, 15-150, and/or 15-210]
- Fundamental Data Structures and Asymptotic Analysis: Ability to implement and efficiently use fundamental data structures and algorithms, such as lists, trees, sorts, searches, hash tables, as well as the ability to perform basic asymptotic analysis, e.g., Big-O, of their operations. [Mitigate with 15-650, 15-122, 15-150+15-210, 10-606+10-607, and/or 17-683]
- System Programming: The ability to use debuggers and read assembly to analyze programs, to use processes and threads as a tool for concurrent and/or

expressive programming, to manage concurrency, and to use an understanding of system design, such as memory hierarchy, to improve program performance. [Mitigate with 15-213/513]

- Mathematical Theory: Exposure to elementary number theory, induction, the algebra of sets, equivalence relations, congruencies, recurrence equations, graph theory, and the methods of mathematical proof. [Mitigate with 15-151/21-127]
- Theory of Probability: Background in probability spaces, random variables, expectations, conditional probability and independence, limit theorems such as the strong law of large numbers and the central limit theorem, random walks [Mitigate with CMU OLI "Probability & Statistics," 36-218, or 21-325]

Participation in Research and the Thesis Option

If you happen to be interested in research, you'll be glad to know that Carnegie Mellon is an environment rich with world-leading researchers engaged in scholarly work across the diverse spectrum of the computer sciences.

Your Academic Advisor and your course professors are your primary points of contact to find research opportunities. By working through them, you will be able to contact interested researchers and research groups directly, without wasting your time and energy, and that of others, by contacting those that are not a good fit for you or likely to accept new students within a timeframe of interest to you. Unless they have solicited such requests, it is considered extremely poor form to contact researchers or research groups without getting an introduction from a professor who knows you well, your Academic Advisor, or the Program Director. In any case, keep your Academic Advisor up-to-date on your research plans, needs, and progress.

In some cases, for students with clear prior interests or prior interactions with Carnegie Mellon faculty members, the Program may initiate this process before matriculation or even admission. But, in the overwhelming majority of cases, in order to ensure students take the opportunity to focus on coursework and become oriented to Carnegie Mellon's research landscape, it is not begun until toward the end of the first semester.

Students who wish to undertake a Master's thesis may, after becoming oriented in a research group or developing a rapport with an individual researcher, propose thesis research. Some students complete thesis research (including a written dissertation and a public thesis defense) in a single semester via 24 units of 15-697 (Graduate Reading and Research). Other students split the research into two semesters, typically 12 units of 15-689 (Independent Study in the Computer Sciences) followed by 12 units of 15-697. Registering for either course requires the approval by the Program of a written Proposal. A student registered for 15-697 must, to the satisfaction of the thesis committee, pass the public thesis defense and submit a final written dissertation by the deadline in order for 15-697 to count as a Qualifying course. With Program approval, some students may complete 12 units of 15-689 without continuing on to complete a thesis.

The office of the Assistant Vice Provost for Graduate Education administers several programs that offer small research grants to graduate students (more information at <http://www.cmu.edu/graduate>).

For further detail about the process associated with undertaking an independent study or a thesis, please consult your Academic Advisor for the appropriate procedures and forms.

Practicum

For many students, internships, especially summer internships, are an integral part of graduate education in computer science. Students who so choose may formally include an internship into their course of study by registering for “15-691: Practicum.” As with any course, the goals and expectations may be revised from time to time. At the time of writing, the course is described as below.

This 3-unit course is designed to both recognize and enhance the practical education of the internship experience. Students who wish to register for this course should submit to their Advisor a copy of their internship offer letter, as well as a personal statement describing their educational goals for the internship. The Advisor will confirm that the internship, the student’s goals, and the program’s educational goals are aligned and, once confirmed, approve the student to register for the course. Upon completion of the internship, the student must submit a reflection statement describing what they learned through the internship experience. The course grade is based upon the student’s successful completion of the internship as well as the thoughtfulness and quality of expression shown in each of the two statements. Contact the Program Administrator or your Academic Advisor for guidance on writing the personal statement and reflection.

University Policies and Guidelines

It is the responsibility of every member of the Carnegie Mellon community to be familiar with university policies and guidelines. In addition to this departmental graduate student handbook, the following resources are available to assist you in understanding community expectations:

- Academic Integrity Website:
<http://www.cmu.edu/policies/student-and-student-life/academic-integrity.html>
- Graduate Education Policies:
<http://www.cmu.edu/graduate/policies/>
- “The Word” Student Handbook:
<http://www.cmu.edu/student-affairs/theword/>
- University Policies Website:
<http://www.cmu.edu/policies/>

The Carnegie Mellon Code

Students at Carnegie Mellon, because they are members of an academic community dedicated to the achievement of excellence, are expected to meet the highest standards of personal, ethical, and moral conduct possible.

These standards require personal integrity, a commitment to honesty without compromise, as well as truth without equivocation and a willingness to place the good of the community above the good of the self. Obligations once undertaken must be met, commitments kept.

As members of the Carnegie Mellon community, individuals are expected to uphold the standards of the community in addition to holding others accountable for said standards. It is rare that the life of a student in an academic community can be so private that it will not affect the community as a whole or that the above standards do not apply.

The discovery, advancement, and communication of knowledge are not possible without a commitment to these standards. Creativity cannot exist without acknowledgment of the creativity of others. New knowledge cannot be developed without credit for prior knowledge. Without the ability to trust that these principles will be observed, an academic community cannot exist.

The commitment of its faculty, staff and students to these standards contributes to the high respect in which the Carnegie Mellon degree is held. Students must not destroy that respect by their failure to meet these standards. Students who cannot meet them should voluntarily withdraw from the university.

Academic Policies

Passing Grades

A passing grade is C or higher, regardless of the home department or level of the course. A passing grade is required for a course to count toward the Requirements or to serve as a prerequisite for another course. The University's grading policy is available at:

<http://www.cmu.edu/policies/student-and-student-life/grading.html>

Minimum QPA

During each semester, students must achieve each of a 3.0 QPA across all courses taken during the semester and also a 3.0 QPA in Qualifying Courses. Furthermore, students must maintain a minimum of a 3.0 QPA cumulatively across all semesters.

Dean's List

Each semester, the Director, or designee, may nominate students to the Dean for inclusion on the Dean's List, which recognizes those students with the highest level of academic achievement. The nomination is according to criteria established from time to time by the Director. At the time of this writing, the Director nominates those full-time students who earn "A" grades (A+, A, A-) in all Requirements-satisfying classes taken during the semester for which the nomination is being made.

Academic Advising

Students are required to review their academic plans and proposed schedules with their assigned Academic Advisor prior to registering for classes and prior to adding or dropping any courses intended to be used to satisfy Requirements.

Registration, Adding and Dropping Courses

Newly admitted students will receive information about course registration. The timetable for course registration, as well as for adding and dropping courses, is set by the University as published in the official academic calendar, which can be found here:

<http://www.cmu.edu/hub/calendar>

Especially after the end of the Add period, you should consult your Academic Advisor before dropping a class. Frequently you should discuss the situation with your course instructor(s) as well. It is generally quite unwise to drop a class without appropriate consultation.

Special alert about drop deadlines

Students should be aware that, beginning with the Fall 2018 semester, the traditional course-drop and course-withdrawal deadlines have changed. Previously it was possible to drop a class without leaving a trace on your transcript until *after* mid-semester grades had been issued. For example, during the Fall 2017 semester the course-drop deadline was November 6th. The course-drop deadline for the Fall 2020 semester is *October 12th*, which is *before* mid-semester grades will be available to you (on October 27th). Master's students can drop *one course in each 12-month academic year* after the drop deadline without leaving a trace on your transcript, with the exception of "doctoral-level courses," which have a different schedule.

Further information is available at:

<https://www.cmu.edu/hub/registrar/course-changes/>

<https://www.cmu.edu/cmuexp-taskforce/academics/>

Restricted Enrollment

Not all classes at Carnegie Mellon are open to all students. Some classes are restricted by program, by year, or by prerequisites. A few require permission of the instructor, portfolio reviews, auditions, etc. Some courses may have reservations governing how many students may enroll from particular programs or seniority levels. If you are encountering difficulty registering for a desired class, please see your Academic Advisor, who may (or may not) be able to help you register for certain courses within the School of Computer Science, and can often offer advice about similar or alternative courses, the likelihood of getting registered, etc.

Responsibility for Satisfying Requirements

It is the sole responsibility of the student to satisfy all requirements of the Program. The Director, Program Administrator, Advisors, and other faculty and staff, although sources of information and advice, are not responsible for notifying students of deficiencies in their academic plans or progress. Students are strongly encouraged to become familiar with the requirements and to review their progress each semester.

Satisfying Prerequisites

Some students may need to take additional courses that do not satisfy any program requirement, in order to satisfy pre-requisites for other courses. This is especially true for students with educational backgrounds other than traditional computer science degrees.

Based on our experience, we expect and encourage students to take 15-513 or 15-213 (Introduction to Computer Systems) prior to taking required or elective systems classes, and, if possible, prior to arrival on campus in the fall. The Summer offering of 15-513 has been especially designed to offer a low-unit, low-cost option for Master's students. It can be taken over the Internet prior to your first semester on campus.

Progress Toward Degree

Students with at least two remaining Requirements must register for, and maintain, a schedule that includes at least two courses that are Requirements or Prerequisites for Requirements.

Program Timeframe

The Program is designed to be completed in no more than four (4) semesters and in three (3) semesters by those with a sufficiently foundational and rigorous undergraduate education in computer science or strongly related field. As a consequence, students may not remain enrolled in the program for more than four (4) semesters, without the prior written or e-mail permission of the Director.

Course Load

Because courses at Carnegie Mellon are very demanding, the program defines a maximum course load, which may be different for incoming and returning students. Academic Advisors can increase the maximum course load for an individual student, based upon that student's academic plan and achievement. Your Academic Advisor will increase your maximum course load, if needed, to allow you to register for any appropriate schedule. Please seek your Academic Advisor's guidance prior to registering, dropping, or adding classes.

Overlapping Courses

As attendance is expected in all courses, students are not permitted to enroll in courses that overlap in time. Please schedule only courses that you are able to attend.

Transfer of Credit From Other Institutions

With the exception of joint degree programs, courses from other institutions may not be used to satisfy any requirement of the program. However, certain courses taken at other institutions may be approved by the Director to satisfy prerequisite requirements for CMU courses which are used to satisfy program requirements.

The MSCS program does not currently count courses taken via the Pittsburgh Council on Higher Education (PCHE) cross-registration system toward program requirements. Carnegie Mellon courses and courses taken through the university's cross-registration system, whether they satisfy program requirements or not, will have grades recorded on the transcript and those grades will be factored into the QPA. All other courses taken, including courses taken by students enrolled in a joint degree program in accordance with the policies governing that joint degree program, will be recorded on the transcript indicating where each course was taken, but without a grade. Transfer credit recorded without a grade will not be taken into account for academic actions, honors, or QPA calculations.

To request prerequisite credit, please provide an official transcript documenting your participation and grade in the course, as well as the course syllabus, to the Program Administrator. Once this is done, e-mail the Director explaining your request. Your request is not approved until you have received written or e-mail approval from the Director or Administrator.

In situations involving unusual hardship, a student may petition the Program to consider transfer credit. As of 2020, no such petition has ever been submitted or approved. Transfer petitions must be approved by the Director, the Department Head, and the SCS Associate Dean for Graduate Programs. A transfer petition must include:

- The course's catalog description, syllabus, and any official description of learning outcomes,
- The course's lecture schedule,
- The course's assignment handouts,
- A sample exam, if sample exams are made available to enrolled students,
- A curriculum vitae for the course instructor(s),
- An official transcript including the final course grade.

The Program may require the student to obtain a professional translation into English of any of the above material, using a translator acceptable to the Program. The Program may require the student to provide for review all student work product submitted as part of participating in the course, including scores and feedback received by the student. When reviewing the transfer petition, the Program will consider the breadth and depth of material covered, compared to the most-equivalent course at CMU, with reference to the learning outcomes relevant to the Program. In compliance with CMU policy, the Program will consider the accreditation status of the institution offering the course. The minimum grade required by the Program may vary depending on the institution offering the course, but will generally be at least a B (3.0) or the equivalent as determined by the Program. As indicated above, if transfer credit is approved, the source of the credit will appear on the transcript and the credit will not bear a grade, affect QPA computations, etc.

Transferring Credit From Within Carnegie Mellon

Up to two courses taken at Carnegie Mellon prior to matriculation into the Master's program may be eligible to be counted toward the program requirements. These courses cannot satisfy any requirement, including a unit-count requirement, of any degree or certification earned prior to, or concurrent with, any portion of the Master's program. To request such credit, please e-mail the Director explaining your request. This e-mail constitutes permission for the Director or designee to review your prior CMU academic records for this purpose. Your request is not approved until you have received written or e-mail approval from the Director or designee.

Curricular Practical Training (CPT) and Optional Practical Training (OPT)

International students may be eligible to take part in paid summer internships via Curricular Practical Training (CPT) and to participate in Optional Practical Training (OPT) for up to 12 months during and after the Program, and may additionally qualify for a 17-month OPT extension post-graduation, under a special program for Science Technology Engineering and Mathematics (STEM). Government regulations are often nuanced and may change at any time. Interested students should contact their Academic Advisor and/or the Office of International Education for more information.

Grandfathering of Requirements

A student is generally bound to the Requirements in force at the time of matriculation, but may elect to satisfy any curriculum Requirements more recent than those under which they matriculated, e.g., a student matriculating in the 2019–2020 academic year may elect to satisfy the Requirements in force during the 2020–2021 academic year.

Because the Master's program is relatively short and in a relatively rapidly changing area, students returning from Leave or Suspension may not be able to return under the same catalogue year, e.g., Requirements, under which they originally matriculated, as the supporting courses may no longer be offered or offered in their original form. Under these circumstances, the Director may approve exceptions to the prior Requirements or require that the returning student satisfy more-current Requirements, at the Director's option.

Additionally, the Director may revise the Requirements from time to time, so long as these revisions do not unreasonably impede the graduation of those in good standing. The Director may approve exceptions to revised requirements to mitigate the impact of revisions upon those affected.

Graduation and Award of Degree

The University's academic regulations govern graduation and the award of academic degrees, including the Master's in Computer Science. The Director shall not unreasonably withhold the certification for graduation of any candidate who satisfies the Requirements of the Program. But, strictly speaking, neither this certification, nor the recommendation of the faculty that a degree be awarded, guarantee

that the University shall award a degree. For example, the University may withhold degrees for individuals who have unsatisfied financial obligations.

Students awarded a degree based on satisfaction of the requirements of the MSCS program will receive a diploma with the degree title of “Master of Science in Computer Science,” “Master of Science in Computer Science — Foundational Studies,” or “Master of Science in Computer Science — Applied Study.”

Statute of Limitations

As documented in the “Master’s Student Statute of Limitations” document on the Carnegie Mellon Policy web site, students who have matriculated at Carnegie Mellon during or after the Fall semester of 2012 must complete all requirements for the master’s degree within a maximum of seven years from original matriculation as a master’s student. Once this time-to-degree limit has lapsed, the student may resume work towards a master’s degree only if newly admitted to a currently offered master’s degree program under criteria determined by that program.

Under extenuating circumstances, such as leave of absence, military or public service, family or parental leave, or temporary disability, a college/school may, upon the relevant department’s recommendation and with the written approval of the dean (or designate), defer the lapse for a period commensurate with the duration of that interruption. Students who are pursuing the master’s degree as part-time students for all semesters of their program, as approved by their program, may also appeal to their program or department for extension of the time-to-degree limit.

Withdrawal of Degree

The University reserves the right to withdraw a degree even though it has been granted should there be discovery that the work upon which it was based or the academic records in support of it had been falsified. In such a case the degree will be withdrawn promptly upon discovery of the falsification. For further information:

<http://www.cmu.edu/policies/student-and-student-life/withdrawal-of-a-degree.html>

Academic Integrity

Please understand that CMU’s standards for academic integrity are high *and may differ significantly from the standards at other places you may have studied*. Conduct

which may be accepted or commonplace elsewhere may result in you *failing a class* here, and may also lead to stronger sanctions, such as temporary suspension, permanent Dismissal from the Program, and/or expulsion from CMU. As just one example, we understand that at some institutions it is acceptable to submit code written by somebody else as long as you can explain it in detail when asked to. *At CMU the submission of any code written by anybody else usually counts as an academic integrity violation, often results in a failing course grade, and may result in additional sanctions.*

Generally speaking, all work you submit must be your own, you must not use the work of others without proper citation, and you must not use resources, including other persons, except as authorized by the course or project for which you are submitting the work.

The University Policy on Academic Integrity includes the University expectations around academic integrity and provides definitions of cheating, plagiarism, and unauthorized assistance. We expect you to review the Policy, found here:

<http://www.cmu.edu/policies/student-and-student-life/academic-integrity.html>

A review of the University's Academic Disciplinary Actions procedures is also recommended. These procedures outline the process for investigating, reporting, and adjudicating violations of the University Policy on Academic Integrity. The procedures also outline the appeal process. The procedures are found here:

<https://www.cmu.edu/student-affairs/theword/academic-discipline/>

Enforcement of Academic Policies

Any student who fails to achieve the minimum QPA, infringes the Academic Integrity policy, or otherwise fails to make appropriate progress toward graduation, falls out of Good Standing with the Program. The first time a student falls out of Good Standing, the student is subject to Academic Probation, which serves as a warning to the student and may also trigger supportive actions on the part of the Program, such as advising meetings and reduced maximum course loads.

If after one semester the student has not returned to Good Standing, or should a student fall out of Good Standing more than once during the course of the Program, the student is subject to Academic Suspension, which is a mandatory, but temporary, leave from the University. It serves as an opportunity for the student to re-evaluate goals, reflect on the requirements for success, and return to the University better prepared to succeed. Any student, who having ever previously been placed on Academic Suspension, fails to remain in Good Standing, may be

Dismissed from the program (i.e., expelled). Dismissal indicates a complete and permanent separation of the student from the Program.

Students will receive official notice of academic actions, such as the imposition or removal of probation, in the form of a letter mailed to the “permanent address” on file with the University.

Administrative Policies

Program Director, Role of

The Director is responsible for the conduct of the Program. The Director has the power to interpret all policies and, with good cause, to grant exceptions to Requirements and policies, as well as to revise them. The Director has the power to delegate this authority.

Employment During Academic Year

The Program is designed to be full-time and Carnegie Mellon is very demanding. Students within the Program are not permitted employment by Carnegie Mellon during their first two full-time semesters at Carnegie Mellon. This includes, but is not limited to, positions such as paid teaching or research assistantships.

Students are permitted to conduct research, participate in teaching activities, etc., as unpaid volunteers or for course credit, so long as doing so does not interfere with academic performance or progress.

At the discretion of the Director, students violating this policy may be suspended or dismissed from the Program.

Summer Employment/Internships

Students are encouraged to seek on- and off-campus opportunities for internships and other employment which reinforces and enhances scientific and professional development.

Please note that special procedures apply for international students. In particular, international students must consult with the Office of International Education (OIE) before agreeing to employment terms or signing an offer letter. Further details may be found beginning here:

<http://www.cmu.edu/oie/>

Employment Eligibility Verification

If you will be receiving a stipend, serving as a teaching assistant, or will have any paid position at CMU, Employment Eligibility Verification will be required.

Every individual receiving a stipend from CMU or employed by CMU must complete the federal government's Form I-9 within three business days following the stipend start date or date of first employment. Individuals working on a federally funded project are further responsible for submitting an E-Verify Processing Request Form to the Office of Human Resources. Further details:

<https://www.cmu.edu/hr/assets/recruiting/restrict/i-9-guidance.pdf>

Leave of Absence/Withdrawal

Matriculated students may voluntarily separate themselves from the University through two mechanisms. A "Leave of Absence" is a separation which is intended to be temporary. In other words, a student who requests a leave of absence states that it is their intention to return in the future. A student may also "Withdraw" from the University, in which case the student is stating to the University that they are separating themselves from the University with no intention of returning.

Should the University choose to grant a student's request for a Leave of Absence, it may impose conditions upon the student's return. For example, should a student request and receive permission to take a Leave of Absence during a period of academic difficulty, the Program may require the student take particular courses upon return or take particular steps to reinforce prerequisite material prior to return. These conditions, to the extent that they are known in advance, are documented on the request form prior to its approval.

The Program adheres to the University's procedures, policies, and process for leaves of absence and withdrawals. They can be found here:

<http://www.cmu.edu/policies/student-and-student-life/student-leave.html>

The Program adheres to the University's procedures, policies, and process with respect to the student's financial obligations as affected by leaves and withdrawals. These policies can be found here:

<http://www.cmu.edu/sfs/tuition/adjustment>

Students who fail to meet required standards of academic achievement may be required to leave the University, either temporarily or permanently. The University policies governing these academic actions can be found here:

<http://www.cmu.edu/policies/student-and-student-life/suspension-required-withdrawal-policy.html>

Return from Leave of Absence

Students seeking to return from a Leave of Absence should contact their Academic Advisor to review their academic situation and academic plans and to ensure that any conditions that were set at the time the leave was granted are satisfied. The next step is to complete and submit the “Petition to Return from a Leave of Absence” Form (available from the HUB). This request should be completed at least one month prior to the start of the semester (more time is required for international students). Students may not return from a Leave of Absence until this petition is approved by the University.

Further information about the Carnegie Mellon University Student Return Policy can be found here:

<http://www.cmu.edu/policies/student-and-student-life/return-student.html>

Program Transfer within CSD, SCS or CMU

Each degree program within Carnegie Mellon operates according to its own admissions process. Admission into one program does not guarantee admission into any other program, nor does it grant any preference. It is very rare for a student to transfer from one master’s program to another—the MSCS program does not expect even one student per decade to transfer in or out.

Carnegie Mellon students seeking to transfer into the MSCS program should contact the Program Administrator for information about applying. Transfer applications must be approved by the Director, the Department Head, and the SCS Associate Dean for Graduate Programs. MSCS students seeking to transfer to another program at Carnegie Mellon should contact that program for information about their requirements and process.

No student may accept admission offers from multiple degree programs, whether at CMU or elsewhere, that have overlapping program timelines, without permission from all of the overlapping programs. Students accepting an admission offer which overlaps the MSCS program may void, even retroactively, their admission to the MSCS program. Please consult your Academic Advisor for further details if necessary.

Deferred Matriculation

Offers for admission into the Program are valid only for the academic year for which they are issued. There is no right to defer an admission offer. Should it be necessary to delay your entry to the Program, it may be necessary to reapply, including

payment of any necessary fees. Should your circumstances necessitate a delay in your matriculation after your acceptance, please contact the Program Administrator or Director to request a deferral, which is granted solely at the discretion of the Program.

Full-time Status Requirement

Those students admitted with full-time status are, in general, required to carry a full-time course load, presently defined by the University as 36 units. Full-time students seeking to convert, temporarily or permanently, to part-time status must request approval from the Director. Because University policy generally prevents the conversion from part-time status to full-time status beyond the enrollment period at the beginning of the semester, status changes should occur only between semesters.

Under certain circumstances international students may be required to maintain full-time student status. International students must seek the advice of the Office of International Education (OIE) before assuming a part-time status, even if that status is approved by the program Director or Administrator.

Financial Obligations and Policies

It is essential that your tuition and other fees be paid on time. The University has a variety of mechanisms to sanction those with delinquent accounts, including withholding degrees, transcripts and registration.

Academic departments do not usually receive information about a student's financial situation, so we may be unable to help you with financial difficulties and processes. Please contact the HUB for more information about financial policies, procedures, and practices:

<http://www.cmu.edu/hub/>

Changes of Address

Students are required to update contact information in a timely fashion, and will be held responsible for any failure to receive official notices due to correct contact information not being on file. International students may jeopardize their status if address information is not current. In particular, international students who leave Pittsburgh for an internship must update their contact information when leaving and when returning.

Students can update contact information using Student Information Online (“SIO”):
<https://s3.andrew.cmu.edu/sio/>

Privacy and FERPA

Under the Family Educational Rights and Privacy Act (FERPA), a student has the right to:

- Inspect and review the student’s education records;
- Request an amendment to the student’s education records if the student believes they are inaccurate or misleading;
- Request a hearing if the student’s request for an amendment is not resolved to the student’s satisfaction;
- Consent to disclosure of personally identifiable information from the student’s education records, except to the extent that FERPA authorizes disclosure without the student’s consent;
- File a complaint with the U.S. Department of Education Family Policy Compliance Office if the student believes the student’s rights under FERPA have been violated.

Please review the University’s full privacy policy:

<http://www.cmu.edu/policies/student-and-student-life/privacy-rights-students.html>

Enrollment Verification

Enrollment Services is the only University office that can provide an official letter of enrollment, official transcript, or enrollment verification. Enrollment verification can be requested online through The Hub at:

<http://www.cmu.edu/hub/registrar/student-records/verifications/>

Intellectual Property

The Program incorporates the University’s policy on intellectual property, which can be found here:

<http://www.cmu.edu/policies/administrative-and-governance/intellectual-property.html>

Assistance for Individuals with Disabilities

The Office of Disability Resources at Carnegie Mellon University has a continued mission to provide physical, digital, and programmatic access to ensure that students with disabilities have equal access to their educational experience. We work to ensure that qualified individuals receive reasonable accommodations as guaranteed by the Americans with Disabilities Act (ADA) and Sections 503 and 504 of the Rehabilitation Act of 1973. Students who would like to receive accommodations can begin the process through the Disability Resources secure online portal:

<https://www.cmu.edu/disability-resources/students/obtaining-accommodations.html>

or e-mail access@andrew.cmu.edu to begin the interactive accommodation process.

For more information please see:

<http://www.cmu.edu/disability-resources/>.

Students with physical, sensory, or emotional disabilities are encouraged to self-identify with the Office of Disability Resources and request needed accommodations. Any questions about the process can be directed to access@andrew.cmu.edu, or call 412-268-6121.

Consensual Intimate Relationship Policy Regarding Undergraduate Students

The university's Consensual Intimate Relationship Policy Regarding Undergraduate Students addresses circumstances in which romantic, sexual or amorous relationships/interactions with undergraduate students, even if consensual, are inappropriate and prohibited. The purpose of this policy is to assure healthy professional relationships. This policy is not intended to discourage consensual intimate relationships unless there is a conflicting professional relationship in which one party has authority over the other as described in the policy.

<https://www.cmu.edu/policies/student-and-student-life/consensual-relationships.html>

Domestic Partner Registration

Carnegie Mellon University extends benefits (e.g., health insurance, CMU i.d. card) to long-term domestic partners of students. Eligible students may elect benefits for their domestic partners by following the registration procedure:

<https://www.cmu.edu/student-affairs/dean/domestic-partner/>

Maternity Accommodation Protocol

Students whose anticipated delivery date is during the course of a semester may consider taking time away from their coursework and/or research responsibilities. All female students who give birth to a child while engaged in coursework or research are eligible to take either a short-term absence or formal leave of absence. Students in course work should consider either working with their course instructor to receive incomplete grades, or elect to drop to part-time status or to take a semester leave of absence. Students engaged in research must work with their faculty to develop plans for the research for the time they are away.

Students are encouraged to consult with relevant university faculty and staff as soon as possible as they begin making plans regarding time away. Students must contact the Office of the Dean of Students to register for Maternity Accommodations. Students will complete an information form and meet with a member of the Dean's Office staff to determine resources and procedures appropriate for the individual student. Planning for the student's discussion with her academic contact(s) (advisor, associate dean, etc.) will be reviewed during this meeting.

Further information:

<https://www.cmu.edu/graduate/programs-services/maternity-accommodation-protocol.html>

Sexual Misconduct Policy

It is the policy of Carnegie Mellon University to maintain an academic and work environment that promotes the confidence to work, study, innovate and perform without fear of sexual misconduct. Such misconduct diminishes individual dignity, is contrary to the values of the university, and is a barrier to fulfilling the university's mission.

Faculty, staff, students, or third parties who violate the university policy on sexual misconduct may face disciplinary action up to and including termination, expulsion, or other actions. Prohibited conduct includes the following specifically defined forms of behavior: sexual assault, sexual exploitation, sexual harassment, stalking, dating violence, domestic violence, retaliation, and violation of protective measures.

Members of the community have many options for reporting suspected prohibited conduct, including:

In person Office of Title IX Initiatives/Title IX Coordinator,
5000 Forbes Ave., Cyert Hall Suite 140.

By phone or e-mail 412-268-7125 or tix@andrew.cmu.edu.

Online, including anonymously <http://www.reportit.net> (username: “tartans”; password: “plaid”).

Possible criminal conduct University Police, 300 South Craig St.,
412-268-2323, campuspd@andrew.cmu.edu.

The University’s policy can be viewed in its entirety at:

<https://www.cmu.edu/policies/administrative-and-governance/sexual-misconduct/>

Additional resources and information can be found at:

<http://www.cmu.edu/title-ix>,

Incorporation of Applicable SCS and University Policies

This handbook describes policies unique to the Master’s in Computer Science Program, as well as many University policies of interest to students within the Program. It is, however, not comprehensive. You can find applicable University-level policies here:

<http://www.cmu.edu/policies/>

Additionally, the School of Computer Science and the Computer Science Department may adopt policies applicable to students within the Program.

Enforcement of Administrative Policies

Violations of Administrative policies, at the discretion of the Director, may result in sanctions including, but not limited to, probation, suspension, or separation from the Program.

Appeals and Grievances

If you believe a grade, penalty, or administrative decision is unjust, or believe a situation is unreasonable or intolerable, you may wish to consult the Summary of Graduate Student Appeal and Grievance Procedures found here:

<http://www.cmu.edu/graduate/policies/appeal-grievance-procedures.html>

Statement of Assurance

Carnegie Mellon University does not discriminate in admission, employment, or administration of its programs or activities on the basis of race, color, national origin, sex, handicap or disability, age, sexual orientation, gender identity, religion, creed,

ancestry, belief, veteran status, or genetic information. Furthermore, Carnegie Mellon University does not discriminate and is required not to discriminate in violation of federal, state, or local laws or executive orders.

Inquiries concerning the application of and compliance with this statement should be directed to the vice president for campus affairs, Carnegie Mellon University, 5000 Forbes Avenue, Pittsburgh, PA 15213, telephone 412-268-2056. Obtain general information about Carnegie Mellon University by calling 412-268-2000.

Resources and Reference

Academic Calendar

The Academic Calendar contains important dates, such as those of the registration periods, add and drop deadlines, University holidays and observances, and the final exam period. The Academic Calendar can be found here:

<http://www.cmu.edu/hub/calendar>

Career

The Career and Professional Development Center is an outstanding resource to guide you as you begin the process of thinking about internships and life after graduation. The career consultants for the School of Computer Science are Katelyn Livingston, kjliving@andrew.cmu.edu, and Allison Viverette, aviveret@andrew.cmu.edu. They are an excellent source of information about employers and opportunities, as well as a great resource as you prepare your résumé and prepare for interviews. Since the Master's program is intense, but short, you are encouraged to contact them during your first semester.

There are many career and internship fairs on campus, including the Technical Opportunities Conference (TOC) early in the Fall semester, and the Employment Opportunities Conference (EOC) early in the Spring semester.

For more information, and for information about additional resources, please do check the Center's Web portal:

<http://www.cmu.edu/career>

International Students

The Office of International Education (OIE) at Carnegie Mellon University is committed to supporting, promoting, and celebrating individuals in an intercultural environment. They advocate for and facilitate international and cross-cultural experiences, perspectives and initiatives. They also help international students with the process of coming into the United States and maintaining legal status here, as well as with the process of settling in within the United States and on campus.

Their web site is a great resource and contains their contact information:

<http://www.cmu.edu/oie/>

Police

University Police provide traditional security and police services on campus, operate crime prevention programs, offer Rape Aggression Defense Systems (RADS) classes and fingerprinting services, and operate a lost and found.

They can be reached by dialing 8-2323 (for emergencies) or 8-6232 (for non-emergency issues) from any campus phone.

When off-campus, in order to contact the local police, call the emergency dispatcher by dialing 9-1-1 from any cellular or landline phone. To reach University Police while off-campus or from a cellular phone, dial 412-268-2323 (for emergencies) or 412-268-6232 (for non-emergency issues).

The annual security and fire safety report may be found at:

<http://www.cmu.edu/police/annualreports>

Other University Police web pages can be found here:

<http://www.cmu.edu/police/>

Emergency Medical Assistance

For emergency medical assistance on campus, call the University Police dispatcher at 412-268-2323. In most areas off campus, dialing 9-1-1 will put you in touch with an emergency dispatcher who can summon emergency medical assistance, e.g., an ambulance, for you.

Routine Medical and Health Care

University Health Services is the on-campus health center. It is available to provide students with routine health and medical care, including addressing nutrition, drug and alcohol problems, and other healthy lifestyle issues, and to help students find health and medical resources off-campus when needed. Appointments can be made on-line and by phone. For more information, please consult their Web site:

<http://www.cmu.edu/health-services/>

Counseling and Psychological Services

Counseling and Psychological Services (CaPS) offers students the opportunity to talk privately about academic and personal concerns in a safe, confidential setting. An initial consultation with CaPS can help clarify the nature of a concern, provide immediate support, and explore further options if needed. These may include a referral for counseling within CaPS, to another resource at Carnegie Mellon, or to another resource within the larger Pittsburgh community. CaPS also provides workshops and group sessions specifically for graduate students on campus. CaPS services are provided at no cost.

For an appointment, call 412-268-2922 during regular office hours. For emergencies, the phone is answered 24x7: every day, including holidays, at all hours of the day and night. If you aren't sure whether a problem is "bad enough" for you to call after regular office hours, you should call and an expert will help you decide. You may contact CaPS about an issue you personally are facing or to discuss a concern about another person.

While calling is arguably the best way to contact CaPS, you may find their web page here:

<http://www.cmu.edu/counseling/>

CMU Pantry

The CMU Pantry is a resource for undergraduate and graduate students to help combat food insecurity on campus.

<https://www.cmu.edu/student-affairs/resources/cmu-pantry/>

Campus Wellness

We believe our individual and collective well-being is rooted in healthy connections to each other and to campus resources. The university provides a wide variety of wellness, mindfulness and connectedness initiatives and resources designed to help students thrive inside and outside the classroom. The BeWell@CMU e-newsletter seeks to be a comprehensive resource for CMU regarding all wellness-inspired events, announcements, and professional and personal development opportunities.

Newsletter sign-up:

<https://bit.ly/BeWellatCMU>

Wellness web site:

<https://www.cmu.edu/wellness/>

Religious and Spiritual Life Initiatives (RSLI)

Carnegie Mellon is committed to the holistic growth of our students, including creating opportunities for spiritual and religious practice and exploration. We have relationships with local houses of worship from various traditions and many of these groups are members of CMU's Council of Religious Advisors. We also offer programs and initiatives that cross traditional religious boundaries in order to increase knowledge of and appreciation for the full diversity of the worldview traditions. Our RSLI staff are here to support students across the spectrum of religious and spiritual practice and would be more than happy to help you make a connection into a community of faith during your time at CMU.

Web site:

<https://www.cmu.edu/student-affairs/spirituality>

Ethics Hotline

The health, safety, and well-being of the university community are top priorities at Carnegie Mellon University. CMU provides a hotline that all members of the university community should use to confidentially report suspected unethical activity relating to financial matters, academic and student life, human relations, health and campus safety, or research.

Students, faculty, and staff can anonymously file a report by calling 877-700-7050 or visiting <http://www.reportit.net> (username: "tartans"; password: "plaid"). All submissions will be reported to appropriate University personnel.

The Ethics Hotline is not an emergency service! To report an emergency, call University Police at 412-268-2323.

University and Public Transit Systems

The Port Authority of Allegheny County (PAT) operates a system of buses and trains that serve the greater Pittsburgh area. Your University ID serves as a pass that allows you to ride most, if not all, of these services for free. You can find routes and schedules here:

<http://www.portauthority.org/>

The University provides a shuttle bus system that is a fixed route, fixed stop transportation option which is available to all CMU students, faculty, and staff. There are different shuttle buses which operate within the geographical areas which surround Carnegie Mellon. Presently, there are buses which service the Squirrel

Hill, North Oakland and Shadyside areas. There are also shuttles serving Bakery Square (Google headquarters) and the PTC (Pittsburgh Technology Center).

The Escort Service is a transportation option that services the geographical areas surrounding Carnegie Mellon, to include Squirrel Hill, Shadyside, and Oakland. The service provides transportation from 9 designated campus pick-up locations to the intersection closest to the rider's residence. The pick-up locations are marked by official university signage, bearing the word "Escort". The Escort Service is limited to a 1.5-mile radius from campus.

More information about shuttles and escort can be found here:

<https://www.cmu.edu/parking/shuttle>

Legal Consultation

The Graduate Student Assembly, the Office of the Provost, and the Undergraduate Student Senate have partnered to offer all CMU graduate and undergraduate students free legal consultations. Typical areas of inquiry include, but are not limited to: Landlord/Tenant, Criminal/DUI, Contracts, Employment, Civil Lawsuits (Plaintiff or Defendant), Personal Injury. Further information:

<https://www.cmu.edu/student-affairs/resources/legal-consultation.html>

Graduate Student Assembly (GSA)

The Graduate Student Assembly (GSA) is the primary campus-wide organization run by graduate students for graduate students. It is a vehicle for collaboration between graduate students and the University administration and the general student body, and is one element of the University's structured Student Government. One very notable role on campus is providing events for graduate students from across campus to take a break from their studies and research, get together, relax, and have some fun.

GSA passes legislation, allocates student activities funding, advocates for legislative action locally and in Washington D.C. on behalf of graduate student issues and needs, and otherwise acts on behalf of all graduate student interests. GSA is the host of the Graduate Student Lounge on the third floor of the Cohon University Center — a great place to study or meet up with friends.

More information about GSA and GSA events can be found on their Web page:

<http://www.cmu.edu/stugov/gsa/>

Global Communication Center (GCC)

The GCC offers free one-on-one tutoring and workshops to help students with written, oral, and visual communication projects, including class assignments. GCC consultants are available to meet during the day or in the evening, and some weekend time slots are available. You can get personal expert help with writing an essay or paper for a class, designing a research poster, or writing a thesis. The GCC also offers workshops on topics including crafting professional e-mails, team communication, slide presentation design, data visualization, and job application materials.

The GCC's web site is:

<http://www.cmu.edu/gcc/>

Student Academic Success Center

The Student Academic Success Center unifies a variety of programs.

Learning Support Learning Support services include Supplemental Instruction (peer-assisted study sessions for selected classes), Peer Tutoring (weekly one-on-one and small-group tutoring sessions), Academic Coaching (one-on-one and small group sessions on time management, productivity habits, stress management, and study skills), Study Partners (assistance in forming and benefiting from peer study groups).

Language and Cross-cultural Support More than 60% of graduate students at Carnegie Mellon are international students, and others are non-native speakers of English who have attended high school or undergraduate programs in the US. Many of these students want to hone their language and cross-cultural skills for academic and professional success. Students can choose from sessions on how to give a strong presentation, writing academic e-mails, expectations and strategies for clear academic writing, how to talk about yourself as a professional in the U.S., developing clearer pronunciation, using accurate grammar, building fluency, and more. Students can make an appointment with a Language Development Specialist to get individualized coaching on language or cross-cultural issues.

The Student Academic Success Center is also charged with certifying the language of International Teaching Assistants (ITAs), ensuring that non-native English speakers have the language proficiency needed to succeed as teaching assistants in Carnegie Mellon classrooms. Students preparing to do an ITA Certification should plan to take classes offered by the language support team at the SASC from the

beginning of their first semester. Start by contacting the language support team at the SASC website or attend a Language Support Orientation at the SASC or in your department.

Further information about the Student Academic Success Center:

<https://www.cmu.edu/student-success>

Center for Student Diversity & Inclusion

Diversity and inclusion have a singular place among the values of Carnegie Mellon University. The Center for Student Diversity & Inclusion actively cultivates a strong, diverse and inclusive community capable of living out these values and advancing research, creativity, learning, and development that changes the world. The Center offers resources to enhance an inclusive and transformative student experience in dimensions such as access, success, campus climate, and intergroup dialogue. Additionally, the Center supports and connects historically underrepresented students and those who are first in their family to attend college, in a setting where students' differences and talents are appreciated and reinforced, both at the graduate and undergraduate level. Initiatives coordinated by the Center include, but are not limited to:

- First generation/first in family to attend college programs
- LGBTQ+ Initiatives
- Race- and ethnically-focused programs, including Inter-University Graduate Students of Color Series (SOC) and Ph.D. SOC Network
- Women's empowerment programs, including Graduate Women's Gatherings (GWGs)
- Transgender and non-binary student programs

The Center's web site is:

<http://www.cmu.edu/student-diversity/>

Veterans and Military Community

Military veterans are a vital part of the Carnegie Mellon University community. Graduate students can find information on veterans education benefits, campus services, veterans' groups at CMU, non-educational resources, and international military service information through the Veterans and Military Community website:

<http://www.cmu.edu/veterans/>

Office of the Dean of Students

The Office of the Dean of Students provides central leadership of the metacurricular experience at Carnegie Mellon. In addition to specific services and policies explicitly described in this handbook, Student Affairs is responsible for many student and community services and initiatives, e.g., athletics, Student Leadership, Involvement, and Civic Engagement (“SLICE”), and wellness initiatives.

More information about Student Affairs can be found here:

<http://www.cmu.edu/student-affairs>

Computing

Carnegie Mellon has a rich computing environment, including OS X-, Linux-, and Windows-based computers, public printers, public wireless networking, and a large library of software licensed for use by students. As members of this community, we are all responsible for the security of these shared resources.

Safe Computing:

<http://www.cmu.edu/computing/safe/>

University Computing Policy:

<https://www.cmu.edu/policies/information-technology/computing.html>

Computing Services Web site:

<http://www.cmu.edu/computing/start/>

If you need assistance, you can contact the Help Center at 412-268-HELP or help@andrew.cmu.edu.

University Libraries

University Libraries offers a wide range of information resources and services supporting graduate students in coursework, research, teaching, and publishing. The library licenses and purchases books, journals, media, and other needed materials in various formats.

Library experts can help and advise with locating and obtaining specific resources, research support, and the use and management of data. Workshops include data visualization with Tableau, cleaning data with OpenRefine, and getting started with Zotero. Drop-in hours for Digital Humanities and for Research Data Management are scheduled during the academic year.

The University Libraries home page:

<https://www.library.cmu.edu>

Parking

Parking on campus is largely based upon an annual fee-for-permit system, although there are a few short-term meters, and the East Campus garage accepts fee-per-use users at low-volume times, and is often free on evenings and weekends. For more information about parking on campus, please contact Parking and Transportation Services:

<http://www.cmu.edu/parking/>

Housing

Carnegie Mellon offers on- and off- campus housing for students, and resources for finding housing in the community. For more information see the Off-Campus Housing resource page:

<http://www.cmu.edu/housing/our-communities/find-housing/off-campus-housing/>

Conference/Travel Funding

Conference Funding is a funding application process provided by GSA and the Provost's Office for students to attend a conference, whether as a participant or as a presenter. The process is managed by the Graduate Education Office. Information is available here:

<http://www.cmu.edu/graduate/professional-development/>

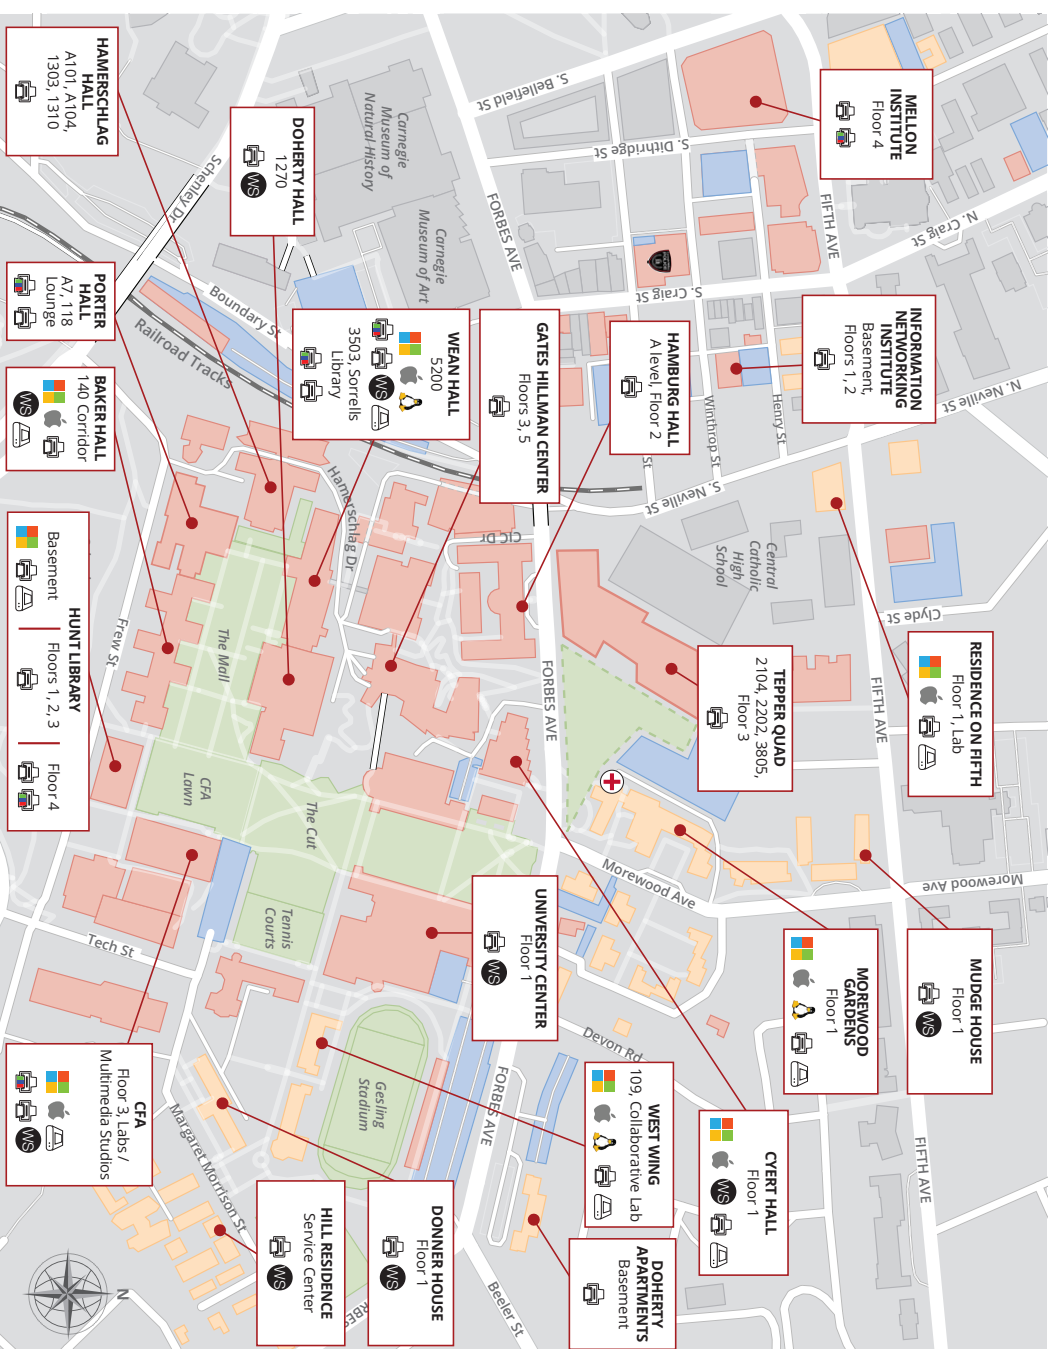

Emergency Loans and University Financial Aid

The Office of the Dean of Students offers short-term emergency loans for supplies, medication, food, or other unexpected circumstances. The loans are interest-free and for short periods of time (not longer than a month).

Students who are eligible for federal or state financial aid and loans (e.g., Federal Direct Loan, Federal Direct Graduate PLUS Loan) can find procedural information here:

<https://www.cmu.edu/sfs/financial-aid/graduate/>

Appendix

Systems Courses, Pre-Approved

- 15-605** Operating Systems
- 15-611** Compiler Design
- 15-612** Operating System Practicum
- 15-615** Database Applications
- 15-645** Database Systems
- 15-618** Parallel Computer Architecture and Programming
- 15-640** Distributed Systems
- 15-641** Computer Networks
- 15-712** Advanced Operating Systems
- 15-719** Advanced Cloud Computing
- 15-740** Computer Architecture
- 15-744** Computer Networks
- 15-745** Optimizing Compilers
- 15-746** Advanced Storage Systems
- 15-821** Mobile and Pervasive Computing
- 15-826** Multimedia Databases and Data Mining

Theoretical Foundations Courses, Pre-Approved

- 15-652** Foundations of Programming Languages
- 15-657** Constructive Logic
- 15-614** Bug Catching: Automated Program Verification and Testing
- 15-624** Foundations of Cyber-Physical Systems
- 15-651** Algorithms
- 15-659** Probability & Computing
- 15-750** Graduate Algorithms
- 15-812** Programming Language Semantics
- 15-814** Type Systems for Programming Languages
- 15-817** Model Checking and Abstract Interpretation
- 15-850** Advanced Algorithms
- 15-852** Computational Geometry
- 15-853** Algorithms in the Real World
- 15-855** Complexity Theory
- 15-857** Performance Modeling

Artificial Intelligence Courses, Pre-Approved

- 10-601** Machine Learning
- 10-725** Optimization
- 15-681** Artificial Intelligence: Representation & Problem Solving
- 15-688** Practical Data Science
- 15-887** Planning, Learning and Execution
- 16-720** Computer Vision

Outside of CSD, Pre-approved as Qualifying

- 02-712** Computational Methods for Biological Modeling, Simulation
- 05-813** Human Factors
- 05-891** Designing Human-Centered Software
- 10-601** Machine Learning
- 10-708** Probabilistic Graphical Models
- 10-716** Advanced Machine Learning: Theory and Methods
- 10-725** Optimization
- 11-641/741** Machine Learning for Text Mining
- 16-642** Manipulation, Mobility and Control
- 16-720** Computer Vision
- 16-811** Mathematical Foundations for Robotics
- 17-637** Web Application Development
- 17-651** Models of Software Systems
- 17-654** Analysis of Software Artifacts
- 17-665** Program Analysis
- 17-731** Foundations of Privacy
- 17-993** How to Write a Good Research Paper
- 18-631** Introduction to Information Security
- 18-742** Parallel Computer Architecture
- 18-756** Packet Switching and Computer Networks
- 21-701** Discrete Math
- 36-700** Probability and Mathematical Statistics
- 36-705** Intermediate Statistics
- 47-830** Integer Programming
- 47-834** Linear Programming
- 80-713** Category Theory

Graduate Courses Within CSD, Frequently Offered

15-605 Operating System Design and Implementation
15-611 Compiler Design
15-612 Operating System Practicum
15-617 HOT Compilation
15-618 Parallel Computer Architecture and Programming
15-637 Web Application Development
15-640 Distributed Systems
15-641 Computer Networks
15-651 Algorithms
15-652 Principles of Programming Languages
15-657 Constructive Logic
15-659 Probability & Computing
15-662 Computer Graphics
15-663 Computational Photography
15-666 Computer Game Programming
15-681 Artificial Intelligence: Representation & Problem Solving
15-688 Practical Data Science
15-712 Advanced OS and Distributed Systems
15-740 Computer Architecture
15-744 Computer Networks
15-745 Optimizing Compilers for Modern Architecture
15-746 Advanced Storage Systems
15-750 Graduate Algorithms
15-780 Graduate Artificial Intelligence
15-812 Programming Language Semantics
15-814 Type Systems for Programming Languages
15-816 Linear Logic
15-817 Graduate Verification Seminar
15-821 Mobile and Pervasive Computing
15-826 Multimedia Databases and Data Mining
15-845 Current Research Issues in Computer Systems
15-851 Computation and Deduction
15-852 Computational Geometry
15-853 Algorithms in the Real World
15-855 Graduate Computational Complexity Theory
15-857 Performance Modeling and Design of Computer System
15-859 Special Topics in Theory
15-883 Computational Models of Neural Systems
15-887 Planning, Execution and Learning
15-892 Foundations of Electronic Marketplaces
